

This digital chronothermostat for electric towel warmer has the peculiarity of being able to rotate 350 ° around the resistance. It is provided with a resistance with particular coupling produced by HT S.p.A. on which it is mechanically fixed. The possibility remains of the right or left coupling to the heated towel rail. Allows weekly programming with fluid heat transfer and temperature control via room sensor. The large display, equipped with backlight, broadly displays each status and mode of user set. There are the functions of open window detection, ASC controller, with 6 fixed programs and 3 settable programs, white backlight and all the functions of the programmable thermostat. (possibility to rotate the entire towel warmer without removing the thermostat) can be supplied with or without coupled resistance.

**DYNAMIC PLUS** is a special version with fluid temperature sensor, allow regulation between 30°C and 70°C DYNAMIC PLUS is equipped with a special heating element, with internal NTC temperature sensor.

# Dynamic

Towel heaters

## Technical specifications

<i>Operational modes</i>	Comfort, Night, Fil-Pilote, Timer2h or Boost2h, Stand-by, Clock-thermostat (9 programs), Antifreeze, Open window detection, ASC, Continuous heating, Key lock 
<i>Conformity marking</i>	CE
<i>Supply voltage</i>	230 VAC - 50 Hz
<i>Powers</i>	1500 W
<i>Selectable temperature range</i>	7°C ÷ 32°C ± 10%
<i>Appliance classes</i>	Class I – Class II
<i>IP protection</i>	IP44
<i>Size</i>	71mm x 97,5mm x 47mm
<i>Available colours</i>	White, Chrome
