

ON / OFF switch device for electric towel warmer with fluid heat transfer. The switch in the ON position is backlit to indicate the state of electricity supply to the heating element. It is connected to the network via a disconnecting device. The symmetry of the product allows the right or left coupling to the towel warmer.

Technical specifications

Conformity marking	CE
Supply voltage	230 VAC - 50 Hz
Maximum power	2000 W
Operating fluid temperature	70°C ± 10%
Appliance classes	Class I – Class II
IP protection	IPX4
Size	36mm x 96mm
Available colours	White, Chrome
