

Digital thermostat for room temperature control.

SYNTHESIS can be coupled to several easily replaceable heating element types and obtainable from main European manufacturers. The device provides the useful “open window detection” function for optimising energy consumption.

When associated to the optional remote controls (“**Helios**” and “**Galaxy**”) SYNTHESIS becomes a clock thermostat and allows the configuration of a weekly program specific for each day of the week. Comfortable visualization of the device settings is provided through a display and LED indicators of different colours. When the device is off the display is hidden behind an elegant mirror-like effect.

Versions:

Synthesis IR: Compatible with remote control “Helios” or “Galaxy”.

Synthesis WiFi: Compatible with Voice Assistant.

Technical specifications

<i>Operational modes</i>	Comfort, Night, Antifreeze (7°C), Boost2h, Stand-by, Fil-Pilote (for Class II model only), Chrono (only with optional remote control), Key Lock, Open Window Detection
<i>Conformity marking</i>	CE
<i>Supply voltage</i>	230 VAC - 50 Hz
<i>Maximum power</i>	2000 W
<i>Room temperature sensor range</i>	7°C ÷ 32°C
<i>Appliance classes</i>	Class I – Class II
<i>IP protection</i>	IP44
<i>Size</i>	131mm x 76mm x 42mm
<i>Available colours</i>	White, Chrome
<i>Optional</i>	Wi-Fi (with Voice Assistant) or remote control “Helios” or “Galaxy” models
